## Global Safety and Quality Standards

Welcome to the website of the International Featured Standards (IFS). The IFS comprise eight different food and non-food standards, covering the processes along the supply chain. However, IFS does not specify what these processes must look like but merely provides a risk-based assessment of them. The different standards are now used by manufacturers and retailers worldwide to meet new requirements for quality, transparency and efficiency resulting from globalisation. To ensure our standards meet the needs of all partners, we develop them together with suppliers and retailers as well as certification bodies. Specific topics that are relevant for individual groups can be found in the dedicated sections of our website. All general information can be accessed from the standard page.

## SQF Assessment Database

The SQF Assessment Database is an audit management and data capture solution developed to contain costs and improve the efficiency and effectiveness of food safety audits. This innovative technology represents significant progress in how audit data is captured, managed and made available, and sets the SQF Program apart from other similar GFSI Program.

For more information on accessing the SQF Assessment Database, select your user type below.
